

## **WHAT IS PERSONAL DATA?**

Personal data is information that is related to a single person, such as their name, age, medical history, diagnosis etc.

## **WHAT IS CONSENT?**

Consent is permission from patients'/staff – an individual's consent is defined as:

- Freely given
- Specific and informed
- Indication of their wishes by which the data subject (patients'/staff) agrees to relevant personal data being processed.

The changes in GDPR mean that we must get explicit permission from patients'/staff when using their data. This is to protect your right to privacy and we may ask you to provide consent to do certain things like contact you, or record certain information about in your clinical/staff records.

Individuals have a right to withdraw consent at any time.
